API 2016 Scholarship Dinner

Last month API held it's annual Scholarship Dinner and awarded over \$83,000 to 48 recipients! We want to give special thanks to this year's Scholarship Committee; Dan Sliter, James McClard, and Matt Kedzierski for their time and effort going through each application and passing out the scholarships at the dinner. API would like to thank of those who sponsored a family for the dinner. Each recipient was allowed to bring two guests to watch them receive their awards. We also want to thank every one who supports API. Whether it's attending our monthly dinners and purchasing raffle tickets, playing and/or sponsoring our annual golf tournament and Fall Fun Shoot, and donating their time at various events, you all made this possible. Even with a downturn in our local economy, we still exceeded our goal of scholarships. Thank you all!

Mr. McClard and Mr. Sliter,

I just wanted to thank you again for the scholarship you offered to my son, Jonathan Oliver. We are very appreciative of the API members' generous scholarship to our son. He has worked so hard these past four years and I know he will "make you proud" as he works towards a degree in chemical engineering.

I would also like to thank you for the wonderful dinner and program that was presented. It was such an enjoyable evening and the pictures with the recipients were very entertaining.

Thank you again for such a great opportunity.

Summit ESP Raising Expectations

Summit ESP: Committed to the California Market During Challenging Market Conditions

Market uncertainty following the recent downturn in oil prices provides challenges for operators and field service suppliers, especially the traditional, top-heavy service companies who often become too internally focused to adequately respond to customer needs.

Despite challenging market conditions, in 2015 Summit ESP decided to move into the California market, fully committing to providing the critical resources needed to help our clients maximize production and minimize total cost of ESP operations.

Focusing on our most important asset – people – Summit hired the very best technical experts as well as experienced shop and field service personnel who work together to provide exceptional customer service. This all-consuming focus on our customers has also driven us to innovative solutions in new equipment design and delivery options, designing and building a state of the art “factory of the future” ready to rapidly respond when the market turns around.

FRACTURED — A bold new film from the director of spOILed!

FRACTURED makes the case that virtually every word and phrase we use when we talk about energy production and consumption is wrong and that these incorrect terms cause people to believe in expensive, dangerous illusions. “What the Frack,” “Fossil Fuel,” “Alternative Energy,” “Clean Energy,” “Climate Change Denier,” “Mother Nature”—all of these terms and others cause people to irrationally believe that traditional energy sources are bad. The film flips these terms and exposes the motivations and hypocrisy of anti-energy activist groups and outright frauds such as the films GasLand and GasLand II.

The film is produced in the same entertaining, provocative and highly informative way that audiences appreciated with “spOILed.”

The documentary is shot and we are in the home stretch of editing. We need your help to finish the film and spread it's pro-energy message far and wide by participating in the Fractured crowd funding campaign. We hope you will participate in the crowd fund campaign and tell everyone in your network about this important film.
