Cal-Coast Acidizing

The Chairman's Corner

Dear Members,

Happy New Year and welcome to 2026!
Reflecting on the productive and successful year that 2025 was, we are filled with gratitude for the combined efforts of the API, local businesses, and individual supporters. As we step into 2026, we look forward to another year of giving back and strengthening our local community.

With the same energy and focus as last year, we will continue to pursue our core goals: creating opportunities for those who need it most, nurturing our partnerships, and providing valuable resources for education and growth. As we move forward into the new year, let's remain united in our shared vision of making a lasting impact, supporting local initiatives, and building a brighter future for all.

Here's to another year of success, growth, and collaboration as we continue our mission to uplift and support those around us!

Annual Wine Tasting Event — Join Us!

We're especially excited to announce that API will be hosting our third annual wine tasting event at Imbibe Wine & Spirits on Tuesday, January 20th at 6:00 PM. This evening of great wine, community, and connection is one of our favorite traditions—and we can't wait to share it with you again!

Feel free to reach out to me at jchafin@calcoastacidizing.com or apibakersfieldchapter@gmail.com or call 661.343.7900.

Adopt - a - Highway

December 13, 2025

Thanks to (l-r), Peter Diaz, Ruby Diaz, Dostinie Martinez, Michael Martinez

Thank you to everyone who participated. Rudy Diaz won the \$25 gift card.

If you would like to Participate in an API Adopt a Highway event,
please contact Tim Frame @ tim@mts-stim.com

API Condors Night

Abbotsford Canucks Vs Bakersfield Condors

January 31st , 2026 @ 7 PM

VS

We have 150 tickets for sale for the Condors hockey game.

Tickets are \$10 each. Seats are Section 205 & 206 rows B through G.

If you would like to Purchase Tickets please contact David Budy @
dbudy@sentinelpeakresources.com

All Tickets Sales benefit the API 2026 Scholarship Fund

API SJV 2026 Scholarship Application Is Now Available On The API Website

The American Petroleum Institute San Joaquin Valley Chapter awards scholarships to young men and women who wish to pursue a career in the petroleum industry, energy industry, or a closely related field. These scholarships are awarded to hard working, dedicated, and deserving Kern County students who are graduating high school seniors or continuing college students who will be attending college or trade school in the fall.

We awarded \$100,000 in scholarships last year, ranging from \$1,000 to \$8,000.

The 2026 API Scholarship Application is now available on our website here:

The application contains the instructional information to apply for a scholarship as well as the criteria that will be evaluated to award the scholarship.

If you have a son or daughter or know of a deserving student who is looking for some financial aid, please encourage them to apply for a scholarship.

Adopt-a-Highway

March 14th, 2026, 7-10 am

VOLUNTEERS NEEDED!

Meet at the corner of Rosedale Hwy and Hwy 43 at 7 am for **Free Breakfast** at Golden Bull

Wear close-toed shoes

Vests, hard hat, gloves, pickers, and bags will be provided

All volunteers will be entered in a drawing for a \$25 gift card

Prizes for most valuable and most unique find.

Contact Tim Frame, 661-447-5123, or tim@mts-stim.com to
Volunteer

API Board Member News: Posted on behalf of the API SJV Chapter Board of Directors: One of our Board members, Vincent Rodriguez, was recently diagnosed with cancer and is undergoing treatment. Vincent is a valuable member of our Board and the California Oil and Gas industry. He works for a local acidizing company and his dedication to our industry shines through his volunteer efforts with Education and STEM. He serves as the API SJV Chapter Secretary and even entertains us as the DJ at past Oil Baron's Balls. A heartfelt thank you for prayers for our friend as we wish him a speedy recovery. If you are in a position to support him and his family, please consider contributing to his expenses through Vincent's GoFundMe page. Let's come together to offer our support and well-wishes to Vincent.

Support Vincent Rodriguez's Cancer Battle

API 2025 Scholarship Night! - Exciting News Alert!

Our 2025 Scholarship Results Are In!

We are thrilled to share that at our June General meeting, our Board proudly awarded \$100,000 in scholarships to 28 deserving local students. This incredible achievement was made possible by the dedication and hard work of countless volunteers and sponsor companies who supported our Chapter at various fundraising events throughout the year.

O&G Traveling Guide

The West Kern Oil Museum, located near Highway 33 and Wood Street in Taft, is a treasure trove of information about the history of Taft and documentation of the petroleum industry. Maintained and operated entirely by volunteers, the West Kern Oil Museum includes indoor and outdoor meeting spaces, vintage office, shops, and equipment, a fire house, a tent house, a shotgun house, a transportation building, a tool house, a library, and a gift shop. The West Kern Oil Museum was founded in 1973 by five women in Taft. Karen K, Sally Knost, Cruzan, Fran Sullivan, and Janice Lemley. Under the fine leadership of Jane Kinsey, Ron Bracken and many industry leaders the Museum started to take shape.

Jameson Trust was a generous donor that provided the property where the museum is located to this day. Jameson #17 is the site where our Wooden Derrick stands to this day. This well was still active until 2005 when it was abandoned. At that time the wooden derrick had to be refurbished and largely torn down and rebuilt. Berry Holding, Chevron, Texaco, Fred Holmes and many other oil companies and generous community members became very active in donating buildings, equipment and expertise to help the museum blossom into what it is today.

A treasure in Taft that provides fun and information for all that visit.

Feature of the month: Black Gold of JoAnn Cowans

Oilfield artist JoAnn Cowans, a founding member of the American Oil & Gas Historical Society in 2003, has donated many artworks to community museums. She also collaborated with Loyola Marymount University Department of Archives and Small Collections on an urban archaeology project of Venice and Playa del Ray.

"Derricks by the Road" painting by JoAnn Cowans

By painting derricks in the 1960s, Cowans documented a history when few if any of her generation thought to do so. According to the magazine *American Art Review*, "Few artists, however, were devoted to the subject of the oil industry in the 1960s. Stylistically, artists were interested in the modernist concerns of abstraction and expression, rather than documentation or narrative."

In recognition of the 2009 150th anniversary of America's first oil discovery, this talented California painter (many of her works are in corporate, private and museum collections) published a "gallery edition coffee table book."

Black Gold, the Artwork of JoAnn Cowans includes 42 paintings. With her canvas, paints and easel (and later, a hard hat), she captured for posterity an important part of what is today the nation's third largest oil producing state. One-hundred years earlier, in the 1860s, the first oil derricks began appearing in California. Oil was so plentiful here that it bubbled up out of the ground. See [Discovering the La Brea Tar Pits](#).

JoAnn Cowans of Fullerton, California, has been painting the state's prolific oilfields since the 1960s. Her work preserves derricks long since removed.

Edward Doheny discovered the [Los Angeles oilfield](#) in 1892. By 1910, California produced 77 million barrels of oil. In Venice, the Ohio Oil Company completed a well in 1929 on county property just east of the city's Grand Canal. This is where Cowans painted many derrick scenes. Her collection includes stories about California oilfields of the 1960s and more recent of paintings: *Black Gold, the Artwork of JoAnn Cowans*.

"Once seen, the depth and significance of her work becomes clear," noted her publisher. "Her place in plain air painting and her own unique view helps us see the majesty of the oil tower."

Newsletter Sponsorship

If you are interested in helping API while advertising your company, the newsletter sponsorship is a great way to do it. Not only is your company displayed in the newsletter, but we also show the same ad on our website and at the general meetings during dinner and between speakers.

There are options for business card, half page, and full page ads. All options are available for a entire calendar year.

Payments can be made online at www.apibakersfield.com and by providing Graphics for ads can be sent to Dustin Trahan, dtrahan8@slb.com

CALIFORNIANS FOR
ENERGY
INDEPENDENCE

Californians for Energy Independence is a coalition that supports state and local policies that allow for continued domestic energy production and opposes those policies – such as oil taxes and energy bans – that would hinder production and increase reliance on foreign oil. For more information, visit: www.EnergyIndependenceCA.com

WHY LOCAL OIL AND GAS PRODUCTION IS IMPORTANT TO CALIFORNIA

California's oil and gas industry evokes strong reactions on both sides of the issue from policymakers to activists, employees to consumers. Factual, scientific based information is often overlooked because of misinformation and lies that are frequently disseminated in the public realm concerning oil and gas production. This is why some believe that California's oil and gas industry is unnecessary and unwanted. Every day, activists push policies at the state and local level to shut down California oil and gas production. They assert that California would be better off if we transitioned to 100% imported oil to meet its vast energy needs.

On the surface, it may seem that transitioning to 100% imported oil is an easy position to take. But when the issue is examined in detail, many challenges and risks exist that would fundamentally harm our state's people, our economy and our values.

Here's how California's people, the economy and our values are at risk if we transition to 100% imported oil:

OUR PEOPLE

We are second chance workers, Veterans, single parents, first generation citizens and union members who work every day to support our families and our community.

LEARN MORE ABOUT CALIFORNIA ENERGY WORKERS

CALIFORNIA'S OIL AND GAS INDUSTRY SUPPORTS:

55,000 JOBS

Nearly 50%
of the workforce is ethnically diverse

PROVIDES 32,550 JOBS

AVERAGE ANNUAL PAY IN OIL INDUSTRY:

\$123,000

nearly double the private sector average in the state

Able as a family with a single wage earner to afford a median priced home in California¹

in the San Joaquin Valley where unemployment rates are nearly double the statewide average. A transition to 100% imported oil will devastate the regional economy and its people.

1. Assuming a 10 percent down payment and an interest rate of 4.5% on a 30-year mortgage, annual payments on a \$554,760 median priced home in California (as of November 2018) would be \$30,652. After inclusion of property taxes and insurance, annual costs would be \$38,396, or 31.2% of the \$123,029 average salary in the oil and gas extraction and support industries. Source of median home sales price is California Association of Realtors. <https://www.car.org/en/marketdata/data/county sales activity>

WHY CALIFORNIA IS AN ENERGY ISLAND AND HOW THAT IMPACTS OUR STATE

WHAT'S AN ENERGY ISLAND?

A combination of geographical factors and public policy choices has led to California becoming an energy island -- we are disconnected from the other lower-48 states and therefore unable to secure additional domestic crude oil sources to support our energy needs of fueling transportation, powering businesses, growing food and producing everyday products. Unique challenges exist that create this dynamic including lack of pipeline infrastructure and little public support for oil by rail or truck. Of course, California is not an actual island, and it is blessed with abundant natural resources, but the policies it has adopted are forcing Californians to rely more and more on distant energy sources to meet our needs. Currently, California imports more than 70% of its crude oil supplies, most of it from foreign sources.

If California continues on this trajectory, it would be choosing even greater dependence on foreign oil which threatens reliability, sustainability and affordability for California's diverse communities. Instead, California's leaders can protect working families, consumers and our global environment by promoting in-state production under the world's most stringent safety, labor, and environmental standards.

WHY DOMESTIC SUPPLIES CANNOT REPLACE CALIFORNIA PRODUCTION

CALIFORNIA IS EXTREMELY LIMITED IN ITS ABILITY TO IMPORT CRUDE OIL FROM THE REST OF THE NATION.

Within the 48 contiguous states, pipeline infrastructure, rail and truck transportation are the constraining factors. With Alaska, other existing commitments limit opportunities to increase supplies.

If we want a domestic supply, we need to produce it here in California.

PIPELINE INFRASTRUCTURE:

No crude oil pipelines exist from other states. Regulatory approvals make this an untenable option.

RAIL AND TRUCK TRANSPORTATION:

Limited crude oil is transported by rail. Rail transport is extremely expensive, highly controversial, and would require an **increase of 243,000 rail cars** to meet current demands. Truck transport is unfeasible due to limited capacity.

ALASKA:

Alaska has been a declining source. While there has been an increase in investment that may counter that trend, it will not be enough to offset California's current production levels in the foreseeable future.
